Education

Indian Institute of Technology (Indian School of Mines) Dhanbad Aug 2023 – May 2027
Bachelor of Technology in Mechanical Engineering (CGPA: 7.68 / 10.00) *Dhanbad, Jharkhand*

Disha Deplhi Public School June 2021 – March 2023
Higher Secondary Education (Grade: 88.2%) *Kota, Rajasthan*

Ram Ratna International School April 2011 – March 2021
Secondary Education (Grade: 90.67%) *Mumbai, Maharashtra*

Technical Skills

Languages: Go, Solidity, TypeScript/JavaScript, C/C++
Libraries/Frameworks: Next.js, React.js, Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Nest.js, Ethers.js, Viem
Deployment Tools: Git, GitHub, Linux, Docker, Foundry, Hardhat

Experience

OnlyDust Aug 2025 – Sept 2025
Open source contributor *Remote*

- Selected for a competitive fellowship program to contribute to open-source projects in the Starknet ecosystem, collaborating with maintainers and building scalable, decentralized applications on Starknet.
- Contributed to 20+ open-source pull requests spanning the Ethereum, Starknet, and Stellar ecosystems, collaborating with maintainers to improve protocol codebases and tooling

Projects

Argumint | *Next.js, TypeScript, Solidity, Ethers.js, Foundry, Node.js, Etherlink, Sequence, Goldsky, PostgreSQL, PrismaORM*

- Designed and developed Argumint, a Web3 social platform enabling users to engage in real-time debates on fandom and opinion-based topics.
- Implemented multi-sided dynamic switching logic, allowing users to change teams multiple times based on in-chat persuasion.
- Engineered a points-based team scoring system, rewarding loyalty and successful persuasion with real-time team score updates.
- Designed a reward mechanism via Tokens and NFTs, enabling users to redeem exclusive perks, discount codes, and platform benefits.

CryptoJar | *Next.js, Solidity, TypeScript, AAVE, Node.js, Express.js, MongoDB, Viem*

- Designed and developed a Web3 micro-savings platform that rounds up crypto payments and channels spare change into community savings vaults.
- Implemented wallet connectivity and transaction monitoring to detect outgoing USDC transfers and calculate corresponding round-up savings amounts.
- Designed a multi-vault architecture with low-, medium-, and high-risk savings options to support risk-based fund allocation.
- Developed a backend payment-tracking system to record transactions, manage pending savings contributions, and prevent duplicate processing.

ReadQuest | *React.js, x402, Node.js, Express.js, MongoDB, Viem, JWT, Base Sepolia*

- Designed and developed ReadQuest, a Web3 reading platform enabling users to unlock premium articles through micropayments or interactive tasks.
- Integrated the x402 payment protocol to enable low-cost, on-chain micropayments for accessing premium content.
- Implemented wallet-based payments and payment verification to securely authorize article access and persist unlocked content.

Achievements

- Finalist, Etherlink Summer of Code 2025 — built Argumint, a decentralized debate platform.
